Date of Submission: 24-01-2022 Date of Acceptance: 05-02-2022

Abstract. Every individual not *beseparated from the communication process* in everydaylife. Likewise, thathappensto а photographer. Photographerscan not beseparatedfromsocialinteractionsorso-called human relationships, communicating with models, assistants, teams, andthesurroundingenvironment. The

most common field of photography among humans is thephotographic model because, in thisfield, theobjectofthephotographis a human. In this study, *theauthorseestheinteractionbetweenthephotographe* rand his model. This is intended to see the interaction between the photographerandthe model. The researchmethodusedis a qualitativeapproachwith a descriptivemethod. In thiscase, thetechniqueofcompletingthe isdonewith in-depthinterviews, observations, anddocumentationstudies. The researchresultsoncommunicationobstacles the interaction between the photographers and photomodels in story-making canhappenfrompsychological, semantic, andknowledgeobstacles. In principle, this communication barrier occurs between the photographerandthe model in theprocessofshooting.

Keywords: obstruction; communicationnoise; photographer; modelling

1. INTRODUCTION

As a generallife, a photographeris a human beingwhoissociallyconnectedwhereverthey are. Itisundeniablethat a photographercannotbeseparatedfromsocialinteractio nor human relations. As a photographer, he alwayscommunicateswithphotomodels, assistants, teams, andthesurroundingenvironment.

The

photographyfieldwhereinteractionoccursmostoftenb etweenhumansis in model photos. Because, in thisfield, thephoto'sobjectishumans. In thiscase, atleasttwopeoplewillbeinteracting, namelybetweenthephotographerandthe model, andthatinteractionwillcontinuethroughouttheshootin gprocess.

Α

photographerwillsurelyalwayscommunicatewiththe models. In thiscase, theywilltrytomaketheatmosphereofinteractionbetwee nthemmorecomfortable. Wheninteractingwiththem, a photographercanpayattentionandassesstheirbodylang uagetoconveytheideaof thedesiredpointofviewand

pose tothephoto model. The resultis a photoworkthatmatchestheconceptthephotographerw anted.

In this study, theauthorsseethatthere are communicationbarriers in

In this study, theauthorsseethatthere are communicationbarriers in theinteractionofphotographersandmodels. At thistime, theworldofphotographyis in greatdemandbymanypeople in allcornersoftheworld. By

2012. The Model Alliance sentanonlinesurveyto 241 andonly 85 responded. However, models, itiscertainlystillmeaningful. Manymodels, especiallyat youngage, sufferfromeating disorders and depression. 68% ofthemodelssufferedfromdepressionandexcessivean while 50% admittedusingcocaine xiety, typeofdrug) atwork. Moreover. 30% ofthemfeltinappropriatelytouched (over-harassed) during a photoshoot, then 28% saidthatthey were forcedtohave sex bysomeoneatwork. These are a matterofgreatconcernbecausemost are stillunder 18 years (storymu.com, 2012).

Anotherreasonthatstrengthenstheresearchert ocarry out this research is the statement from one of theinformantsnamed (pseudonym) model Dea whotoldherexperiencewhilebeing a model: "Yes, not everyshootingprocessisthesame. I can say thisbecause haveseenfromseveralexperiences, ifthephotographerisdifferent, wesurelyneedtore-adapt. The difficultthingis, ifthe model isimpatient, orviceversa, theproblemswilloftenlyoccur. So. ifI'mbeingaskedaboutobstacles,

As mentionedabove, thisisinterestingto study. The interactionbetweenthephotographerandthe model is not alwayssmooth. Therefore, researchers are interested in conductingthisresearch. Havinggoodcommunicationbetweenthephotographer andthephoto model isimportanttounderstandtheconceptofshootingandthe resultstobeachieved in a photoshootandreducemisunderstandingsandthingsth atwillharmboth.

Photographer in communicationscience.

wellobviouslytheremustbeobstacles.

Α

topicthattheresearchersraiseisphotographer. Itis a professionthatworksbehindphotostocaptureeverym oment in ourenvironment. Althougheveryonecanproducephotosusing his camera. However, mostpeoplewillbelievemore in givingtheresponsibilityofcapturingthemomentsofth eirlifeto a photographer, consideringthatsometimesthemomentthatwillbeim mortalizedisanimportantmomentthatmay not berepeated.

"Professional photographersmakephotography a profession, a jobtoearnmoney. Usuallyprofessionalphotographersequipthem selveswithphotographyskillsthatadequate" (Darmawan, 2009).

We canseewhetheror not a photoisgoodfromonepointofview, namelytheconveyanceofthemessage, idea, orideaintendedbythephotographer, whichisconveyed in theformof a photograph. And a photographeristhenjudgedtobegoodorsuccessful in termsofthemessages, ideas, orideas he putsinto a photoworkthatisconveyedandcanbeunderstoodandu nderstoodbyotherpeoplewhoseeorenjoythephotowork.

For example, when a photographercaptures a momenthatdepictssadnessthroughthecameraandpr oduces a photograph, thenpeoplewhoseethephotocanfeelthesadnessofthe photo, thenthephotographmadebythephotographerisconsid eredgoodbecausewecancapturethemessages, ideasandideasfromthephotographeraboutthe sad atmospherethatispresented in theresultingphotowork.

Goodphotoworkcannotbeseparatedfromthep hotographer'sconcept, idea, andgoodattitude. Apartfromsupportingthepreparationandgoodphotog raphyequipment, thegoodattitudeof a photographerisveryimportant. Theremustbe a processofgoodphotographyattitudeforeverygoodphotograph, whichisthephotographer'sresponsibility. Itmaysoundverysimple.

Butthemoreyouthinkaboutit,

thestrongerthisfactbecomes. A person cannotproduce a goodphoto, whichismemorable, especiallyonewiththecharacter, ifitis not basedon a goodandproperphotography mental attitude.

In order toproduce a masterpiececalled a photo. thephotographerneedstoexplorewhatkindofwork he willmake, throughthephotographer'sideasandconcepts, willgiveto whatattitude he his worksothattheintendedmessagecanbeconveyedtoot herpeoplewhoseeit—thephoto. The photowasproducedthroughphotographicactivity; thebirthof conceptoridea, thefruitofthephotographer'sthoughts, experiences, andtechniques.

By using a cameraandothersupportingequipment, photographingactivitiescanbedonebyanyonewho has theopportunity, butfor a photographertotakepictures.Well, which not everyonecando. By lookingatthevariousworksofphotographersaroundu

www.ijemh.com

some convey messages with pictures of their work direction of the support of thtly, persuasively, suggestively. Someevenconvey a question mark tothepublic. Ofcourse, thisisinfluencedbythebasicconcept, theartdirector, thesocial strata ofthepublic, andeventhephotographerhimself. Finally, theselfconcept in whichknowledge, hope, andvalues form a photographymentality for a photographer. Photographerorphotographer(photographers) are: "Peoplewhocreateimagesbycapturinglightfromth esubjectoftheimagewith cameraorotherphotographicequipment, andgenerallythinkoftheartsandtechniquestoproduceb etterphotosandseektodeveloptheirknowledge. Manyphotographersusecamerasandtheirtools jobtomake a living ." (Indonesia, 2000)

Photographyisoftenreferredto as theself-expressionactivity of a photoartist. It has been around form or ethan 1.5 centuries and has become an endless innovation in line with the development of technology and science that supports it.

PhotographycomesfromGreekandconsistsoft photosmeanlight, and graphic means painting and drawing. Photography (photography) meanspaintingordrawingwithlighttheartorprocessofproducinganimagebylighton orsurfacethatissensitized. Photographyisanactivitythatbeginswiththeformatio conceptorphotoideas, then the activity of photographing itself to the results ofphotowork, his become phenomenonpresenteverywhere (omnipresence) even in everyelementofpeople'sliveswho enteringtheinformationage.

Communicationbarriers

Althoughtheinformationconveyediseasyto understand, itturnsoutthattheestablishedcommunicationis not underwhatisexpectedordesiredcanhappenbecausem anyobstaclesmayarise in theimplementationofcommunication.

A decrease in the content and quality of themess age can occurat any stage in the communication process, from the formulation of the concept of an idea in words to the moment of its utilization. Furthermore, these barriers can generally be classified into three according to (Arni, 2009), namely:

(1)Personal Barriers. namelycommunicationdisordersarisingfromemissio ns, values and bad listeninghabits. Personal barriersoftenincludethepsychologicaldistancebetwe enpeoplesimilartoactualphysicaldistance. (2) PhysicalBarriers, namelycommunicationdisordersthatoccur in theen viron ment where communication occurs. (3)SemanticBarriers. namelythesebarriers, comefromthelimitationsofthesymbolsthemselves. There severalcharacteristicsofthelanguagethatmakethedec odingprocess in thelanguageincreasinglydifficult, including:

> (1) Languageisstaticwhiletherealityisdynamic

(2) Languageislimitedwhiletherealityisunlimi ted.

(3) Languageisabstract.

In additiontothestagesandconsequencesofbarriers in communication, feedbackisverynecessary. Feedbackistheprimarydirectionforthemessagesender to monitor whetherthemessageisunderstoodandusedbytherecipi ent as expected.

Basedonthedescriptionabove, itcanbeconcludedthatcommunicationisveryimportant in everydaylife. Withoutcommunicationorlackofcommunication, theworkwillbelessthan optimal, andtherewillbemisunderstandings in capturinginformation.

Communicationprocess

The communication processises sentially a processofconveying meaningfulsymbolbyone a person toanother, eitherwiththeintentionofunderstandingorchanging behaviour.Communicationcanbeeffectiveorsuccessf ulifthereis commonunderstandingofthemessagecontentbetween themessagespreader (communicator) andtherecipient (communicant). disseminatorconveysthecontentofthemessagethroug h a meaningfulsymbol. The symbolscanberegarded "footbridge" "vehicle" tocarrymessagestothemessage'srecipient.

Itcanbeseenthat in communication, there are threeimportantelements, namely: communicator, message, and communicant. Communicators are

Volume 3, Issue 1, pp: 37-44

www.ijemh.com

sources who have ideas or ideas about something that will be conveyed to the communicant. Messages are ideas in

theformofmeaningfulsymbolsconveyedtothecommunicant, whilethecommunicantisthe person orentitywhoreceivesthemessage.

Communicationactivitieswill not effectivelyrunifthey are not supportedbythesethreefactors: message, and communicant.

Thus, order forcommunication to take place effectively, wemustpayattentiontothefollowingfactors:Thesefac tors are communicator, message, and communicant. Anotherimportantfactor communicationprocessisfeedbackoreffect. Feedbackplaysanimportantrole in communicationbecauseitdeterminesthecontinuation ofcommunicationorthecommunicator'scessationofc ommunication. In otherwords. feedbackdeterminesthesuccessorfailureof communication process.

- (1)
 Credibilityisoneofthefactorsofcommunicators whohaveanimportantrolesothatthemessagesco mmunicatedcanrunsmoothlyandcanbeaccepte dorunderstoodbythecommunicant.
 Accordingto Rakhmat (2007) in his bookPsychologyofCommunication, credibilityis a set ofmeaningfulsymbolsconveyedbycommunicators.
- (2) The messageis set ofmeaningfulsymbolsconveyedbythecommun (Effendy, 2000). conveyingmessagesorally, thefactorofchoosingwordsisveryimportantsot hattheintended target understandsthemeaningconveyed. The messagemustbedesignedanddeliveredtoattract theattention of the communicant. The messagemustarousethecommunicant's personal needsandsuggestwaystogetthoseneeds. The messagemustsuggest waytogetappropriateforthegroupsituationwher ethecommunicantismovedtogiveopinions achievinggoals (Rakhmat, 2007).

Basedonthesemessages, acommunicatormustconveymessageswell, forexample, howclearthecontentis? The message, whether the language used is easy to understand, whether the content of the message is by the community's

needs.

Symbolicinteractiontheory

The

essenceofsymbolicinteractionemphasizesanactivitych aracteristicofhumans, namelycommunicationortheexchangeofsymbolsthat givenmeaning (Mulvana, 2005). Manyexpertsbehindthisperspective thatthe say individual as a human beingisthemostimportantthing. thatindividualscanbedirectlystudiedandanalyzedthrou ghinteractions with other individuals. SelfandSocietyisthetitleofthebook, whichisthe main referenceforthetheoryofsymbolicinteraction, reflectingthethree main conceptsofthetheory. brief definition of the three basic ideas of symbolic interaction, namely:(1) Mind (Mind). Mindistheabilitytousesymbolswiththesamesocialmea ning. whereeach individual mustdeveloptheirthoughtsthroughinteractionswithoth erindividuals (West, 2008). Meaningfulsymbols are verbal actions in language, whichisthe mechanismof human interaction. The useoflanguageorsymbolicsignsbyhumans in theirsocialinteractions, in turn, generates thoughts that enable them to internalizes ociety. accordingtoMead, themindpresupposestheexistenceofsociety; otherwords, societymustexistbeforethereisthought (Mulyana, 2003). humanscantemporarilypreventtheiractionsanddelayt heirreactionsto a stimulus (Mulyana, 2003). Humanscanalsopickup a stimulus amongmanystimuliinsteadofreactingtothefirstandmo stpowerful stimulus. Humanscanalsochooseanactionamongvariousplanne dorimaginedactions.

partofthesocialprocess. Otherwise, thesocialprocessis

(2) Self (Self). Selfistheabilitytoreflectononeselffromanother'spoint of vieworopinion. Here theself cannot be seen from within a person through self-introspection. For Mead, the self can only develop through the ability to take on role s, namely imagining one self from the eyes of others (West, 2008). The

AccordingtoMead,

Volume 3, Issue 1, pp: 37-44

www.ijemh.com

conceptofseeingoneselffromtheeyesofothersis a conceptthat Charles Cooleyconveyed in 1912. The conceptisthelookingglassself,

namelytheabilitytoseeoneselfbyreflectingotherpeopl e'sviews. Cooleybelievedthatthere were threeprinciplesofdevelopmentregardingthelookinggl assself, namely(1) imaginingourappearance in front ofothers, (2)

imaginingtheirjudgmentofourappearance, and (3) feelinghurtorproudbecauseofhowwefeel.

Societyis a networkofsocialrelationshipsthat are created, built, andconstructedbyeach individual in thecommunity, andeach individual isinvolved in thebehaviourtheychooseactivelyandvoluntarily, whichultimatelyleadshumanstotake a role in thecommunity.

II. METHODOLOGY

The researchapproachused in this study is a constructivistparadigmwithdescriptivemethods. A descriptivemethodexaminesthe status of a groupofpeople, anobject, a set ofconditions, a systemofthought, or a classofevents in thepresent. This descriptive research aimstomake a systematic, factual and accurate description, picture, or painting of the facts, and relationships between the investigated phenomena.

"Methodologyistheprocess, principles, andproceduresthatweusetoapproachproblemsandsee kanswers" (Mulyana, 2003). According to Sugiyono (Sugiyono, 2007), qualitativeresearchmethodsexamine natural objectswheretheresearcheristhekeyinstrument, data collectiontechniques are combined, data analysisisinductive, andqualitativeresearchresults are

used to emphasize meaning rather than generalization.

Qualitativeresearchaimstomaintaintheforman dcontentof behaviourandanalyzeitsqualitiesinsteadofturningthe mintoquantitativeentities (Mulyana, 2003).The researchersmethod in this study wastousedescriptiveresearchmethodswithqualitative data analysis. Itiscalled descriptivemethodbecauseitdoes usehypothesesandvariablesbutonlydescribesandanal yzesexistingeventswithoutspecialtreatmentfortheobj ectsstudied.

In thebookCommunicationResearchMethodsregardingt hedescriptivetype, Jalaluddin Rakhmat explainsthat "Descriptiveresearchonlydescribessituationsorevents . This researchdoes not seekorexplain relationships, testhypothesesormake predictions. (Grace, 2002)

Furthermore, Rakhmat explained,

"Anothercharacteristicofthedescriptivemethodisthee mphasisonobservationandthe natural setting (naturalizationsetting). Researchersact as observers. He onlymakescategoriesofperpetrators, observessymptoms, andrecordsthem in anobservationbook (Rakhmat, 2002).

Data collectiontechnique

Qualitativeresearch data collectiontechniques are observation, in-depthinterviews, anddocumentationstudies.

- (1) Observationsmade in this study were observations. Observations were madeusing participant observation on the object under study, namely those related to communication barriers in the photographer's interaction and the model in the shooting process.
- (2) The interviewsthattheauthorconducted in the study were intended to find out the views, events, activities, opinions, feelings of the resource persons (subject matter experts). Interviews were conducted to find out about communication barriers in the interaction of photographers and models in the shooting process.

Thistechniqueisveryimportantforqualitativeresearch, especiallyforcompleting data and obtaining accurate data and appropriate data sources.

- (3) In this study, theauthorsalsoconducted a study ofdocumentationaboutcommunicationbarriers in theinteractionofphotographersandmodels in theshootingprocess. Documentation study conducted in this research traces data from several sources related to this research, for example, literature on photographers, models, and symbolic interactions from communications cience books and similar previous studies.
- (4) In this study, theinformantsselectedbytheresearcher were a photographerandtwoprofessionalmodels. The techniqueofdetermininginformants in thisqualitativeresearchispurposive sampling (a purposeful sampling technique) thatisthesampleistakenthroughcertainconsiderations bytheresearchobjectives.

III. RESEARCH FINDINGS

chthisresearch.

Psychologicalbarriers

Dea (not her real name), a researchinformantwhoworks as a professional model, toldaboutthecommunicationbarriersshe had experienced in thephotographer'sphotoshootprocess.

saidthatthecommunicationprocesssheexperienced eachphotoshootwasverydiversebecauseeachphotog rapher had a differentstyleandmethod. Itmeansthat Dea model has to adapt and adapt to the different characters of the photographer. When Dea didherfirstphotoshootwith a newphotographerworkingwithhim, feltcompelledtofollowtheadaptationprocess until he he couldunderstandwhatthephotographerwanted. Itmeansthat Dea andthephotographermustmakeadaptationssothatthe shootingprocessrunssmoothly. Itiswherethesocalledpsychologicalbarriersoccur.

Dea alsosaidthatmodelsoftenexperiencenervousnessifth ephotographeris a reliableandwell-knownphotographer. Itbecomes a pressureand a newchallengeformodelstoproducethemaximumstyl eandexpressionaccordingtothephotographer'sexpectations.

The photographerinformant, Budi (not his alsoconveyedalmostthesamething. name). Photographersalsoexperiencepsychological barriers, especiallyifthey are photographingmodelsthat are considereddifficulttobedirectedaccordingtothephot oconceptthatthephotographerwants, ordifficulttorealizethephotoconcept, ideaorideathatthephotographerwants. Itisconsidered triggerforchangingemotionalmoodstobecomeunsta ble, forexample, feelingannoyedwiththesituation. Photographersdo not infrequently experienceit. Especiallyifthephotographerand model tiredofdoing a long photoshootthattakesalldaybut has not gotten a photomatchingthedesiredconcept, things like this can often make them give up and finish thephotosessionrightthenandthere, andtheniftheyfeeltheemotionalatmosphere has startedtoimprove, start theywill theirphotoshootactivitiesagain.

Dewi (pseudonym), thisprofessional model,

also admits that she experiences the same obstacle, namelypsychologicalbarriers. Dewi sharedthatshealsooftenfeelsdisappointedifthephotost akenbythephotographerdo matchtheconceptshepreviouslyhopedfor. In anothersituation, Dewi alsosharedthatshe once did a photoshootwith photographerwhoseappearancescaredher, andthenthismadetheatmosphereofthephotoshoottens eandmadeherfeeluncomfortable. If thishappens, thephotosobtainedwillcertainlymisstheexpectedconc eptthatwill not beachieved. In thepsychological factors experienced by the model andphotographerduring a photoshootwillaffectthe photoshoot. Psychologicalbarriersbecomeoneoftheobstaclestothe communicationprocessthatoccursbetweenthephotogr apherandthe model in a photoshoot.

Semanticbarriers

The informants in this study conveyed other obstacles they experienced during the shooting process. The photographer and the model saids emantic barriers they felt during the photoshoot.

As explained in theintroductorysectiononsemanticbarriers, thesebarriersstemfromthesymbols' limitations. Severallanguagecharacteristicsmakethedecodingprocessmoredifficult, such as staticlanguagewhiletherealityisdynamic. Itcanbeseenfromthenarrativesof Dewi and Dea as modelswhoexperiencesemanticbarriersdirectly in theshootingprocess.

Whenphotographersdirectthestyleorprovideexplanations, sometimesthey, as models, do not understandwhatkindofphotographertheywant. Even thoughthey, as models, havetriedtofollowthephotographer'sdirection.

In thiscase, thewriterseesthatlanguageisstatic. Whenphotographersconveymessages verbally using language, it is often difficult formodels to understand as communicants. It is where these manticbarrier comes in.

Languageislimited, whiletherealityis not limited. In this study, theauthorseeslanguagelimitations as a semanticbarrierfeltbythe model andthephotographer as theinformantofthisresearch.

If examinedfromlanguage, theauthorcanfeel what the photographer and the model experienced. The language is indeed limited, so when the photographer gives instructions, directions, or styles, it is often not understood by the model. Yet, the reality itself is not limited.

Volume 3, Issue 1, pp: 37-44

www.ijemh.com

Languageisabstract.

Itcanbeseenfromthephotographer'sinteractionandthe model duringtheshootingprocess. Whentheyinteractwitheachother, there are timeswhenthe verbal messageis not understood. The photographerandthe model admittedthatthey had triedtounderstandeachotherwhattheywanted, butthere were alsotechnicalproblemsormisunderstandingsbetweent hephotographerandthe model becauseofthisabstractlanguage.

Knowledgebarrier

In additiontothetwoobstaclesabove, theauthoralsofinds a knowledgebarrier in theinteractionofphotographersandmodels in theshootingprocess.

Itcanbeseenclearlyfromthedescription of Dewi as a model, whosaidthatshesometimesdid not understandwhatthephotographermeantwhenitwasrel atedtonewproductsorthingsnewto Dewi. Likewise, photographers' educationalandculturalbackgrounds are alsodifferentwhenmeetingnewmodels. Italsooftenhinderstheshootingprocess.

Photographersneedtoadaptagaintotheconditionsofthe model.

Itmeansthatknowledgebarrierscanalsooccurforphoto graphersandmodels in theirinteractions in thephotoshoot.

IV. DISCUSSION

Symbolicinteractiontheoryemphasizestherela tionshipbetweensymbolsandinteractions. The coreviewofthisapproachisthe individual (Q-Anees, 2007). Manyexpertsbehindthisperspective say thatthe individual isthemostimportantthing in sociology. They say thatindividualscanbedirectlystudiedandanalyzedthr oughinteractionswithotherindividuals.

Accordingto Ralph Larossaand Donald C. Reitzes (1993) in (West, 2008), symbolicinteractionessentiallydescribes a frameofreferenceforunderstandinghowhumans, togetherwithotherpeople, create a symbolic worldandhowtheworldshapes human behaviour.

Dadi Ahmadi, in his article, also explains the concept of interaction in the theory of symbolic interaction:

Humans are essentially interacting creatures. The interaction is exclusive between humans and inclusive of the entire microcosm, including human interaction with the created world. In short, humans are always interacting.

Everyinteractionrequirescertainmeans.

Meansbecome a symbolizing medium of what is intended in an interaction (Ahmadi, 2008).

Thistheoryisrelevanttotheresearchthattheaut hordid. authorseesthatifthissymbolicinteractiontheoryemph asizestherelationshipbetweensymbolsandinteraction then this study, in thesesymbolsandinteractionsoccur in photographersandmodelswhointeract photoshootsession. Where a photoshootsession, theinteractionbetweenthephotographerandthe becomesimportantbecausetheideas, conceptsandideastocreate a photographicwork are conveyedthroughsymbolsthatshouldbeunderstood, understoodandperceivedequallybetweenthephotogr apherandthe model sothattheconceptandpurposeofthework are made. photocanbeachievedwhere photographerconveysthemessagethrough a model withthecreatedphotowork.

Symbolicinteractionexistsbecausethebasicid easformthemeaningthatcomesfromthe human mind (mind) abouttheself (self) anditsrelationshipamidsocialinteraction. andtheultimategoalistomediateandinterpretmeaning in society (society) whereindividuals are settled. In study. itisclearthatthebasicidea formingmeaningthatcomesfromthe human mindisthephotographerandthe model (mind). Bothinteractaboutthemselves. They convey messages to each other both verbally and nonverbally Itaimstointerpretthemeaningofthephotoworkproduc edfrom a photoshoottoproducemaximumphotowork andobviously. expected. the photowork can be liked and understood by the community (society).

As notedby Douglas (1970) in Ardianto (Q-Anees, 2007), meaningcomesfrominteraction, andthereisnootherwaytoformmeaningotherthanbybui ldingrelationshipswithotherindividualsthroughinteraction.

V. CONCLUSION

Basedontheresultsofresearchcarriedoutoncom municationbarriers in theinteractionofphotographersandphotomodels in making photoworks, itcanbeconcludedthatdisplaying a photographis not easy. In a photoshoot, thereisaninteractionbetweenthephotographerandthe model,

whereboth of them try to understande a chother's desire to

Volume 3, Issue 1, pp: 37-44

www.ijemh.com

present a photoworkthatisbythewishesofeach, although in practice, itisconstrainedbyvariousobstaclesthatoccur, rangingfrompsychologicalbarriers, semanticbarriers, andknowledgebarriers. In principle, thiscommunicationbarrieroccursbetweenthephotogra pherandthe model in a photoshoot.
